**Subject:** Working from home today

Hi Mike, just FYI that I'm working from home today to focus on the WA hydro permits. I'm regularly scheduled to work at home today, though originally I'd planned to come into the office. Briefly, here's what I'm doing today:

WA hydro permits

- 30 minute project planning re: tracking outstanding items
- Set up webinar with tribes.
- 316(b)
  - o Summarize status of 316(b) inc. my conversation with Sean Ramach last week and questions from Corps and BOR. Share with Jamey.
  - o Review Fish Passage plans and other reports I hope to be the basis for the 316(b) permit requirements.
- Download and RW hydrocarbon monitoring data from Corps.
- RW spreadsheets from the Corps on their outfalls and start applying those to permits.
- Incorporate new info into permits and Lower Columbia Fact Sheets, and continue on Lower Snake and Grand Coulee Fact Sheets.

I'll also call into the unit meeting and another meeting on TMDL litigation, but will probably be multi-tasking as I'm listening in. Tomorrow, I'll be in the office.
